## Profile

Choosing a doctor, whether it's for your primary care or for specific medical treatment, is a very important decision. The information provided is intended to help you make more informed choices about your health care. Get details about a doctor's experience and practice and a list of the hospitals and other places they may see patients. *Note:* We are unable to evaluate some doctors for the Evidence Based Medicine quality designation because they don't treat enough patients for the chronic diseases or preventive care considered.
